

EagleLight 8 Watt LED Dimmable LED House Hold Bulb (Replaces up to 60W)

The EagleLight Dimming LED House Hold bulb offers a wider distribution of light than most LED light bulbs due to the corn cob configuration of 150 LEDs. This bulb replaces up to a 60watt incandescent light. The corn cob LED configuration allows for more light back towards the socket than many traditional light designs. This bulb works well for desk lamps and table lamps where light is needed directed back towards the socket. This LED bulb design is great for hotel lobby and other areas that have lights on many hours of the day. This LED house hold bulb is great for closets, garage lighting, hallways, and LED bathroom lighting.
